

IEM submitted their electronic copy along with their bid package. Unfortunately, after multiple attempts, when we inserted the usb drive to open the file, the screenshot below is all we received. We are not sure if the files were locked or corrupt, but access was denied. In the Q&A period we stated that we would not accept files that were locked, only unlocked .pdf files were acceptable. (Q&A #4, pg. 1, Qst. 2)

We could not get the file to open therefore this is all I can provide as the bid package.
